PROJECT DESCRIPTION

August 1, 2018

Project Location: The City of Covina (City) is in the San Gabriel Valley region of Los Angeles County, approximately 22 miles east of downtown Los Angeles. The Town Center Specific Plan area ("Plan Area") is in the central portion of the City, in the City's "Downtown" district, an area with a charming downtown, well-established neighborhoods, and the Covina Metrolink station.

The Town Center Specific Plan was adopted by the City in 2004, and amended on 2006, 2007, 2008, 2009, 2012, and 2016.

The Plan Area is irregularly shaped and generally bounded by Barranca Avenue and 1st Avenue to the east, 4th Avenue and Valencia Place to the west, the alley south of Center Street to the south, and one to three parcels deep north of the rail tracks (north of Front Street) on the north. The Project includes a General Plan Amendment, Town Center Specific Plan Amendment, Zoning Map Amendment, and Zoning Code Text Amendment to revise the Town Center Specific Plan boundary (Figure 1) and revise the zoning designations within the Plan Area

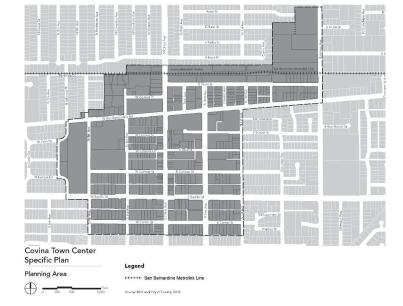

The proposed increased Plan Area encompasses approximately 226 gross acres. Regional access to the Plan Area is provided by Interstates 10 (San Bernardino Freeway) and 210 (Foothill Freeway), and State Route 57 (Orange Freeway).

The Plan Area is in an urbanized suburban downtown. The Plan Area has unique, historic, and civic charm and character. The Plan Area was developed over the past century with the Downtown prospering when citrus growing predominated in Covina and the San Gabriel Valley. The Plan Area includes both older and more recent industrial buildings, 1960s style corridor commercial buildings, a local hospital (Inter-Community Hospital) and related medical offices/businesses, local civic uses, and a mix of low scale residential uses.

Project Characteristics: The Town Center Specific Plan identifies the long-term vision and objectives for private development and public improvements within the Plan Area.

The proposed Town Center Specific Plan Update will include the following components:

- · Introduction and Overview;
- · Vision Framework:
- · Land Use and Zoning

- · Design Standards and Guidelines;
- · Specific Plan Process and Administration: and
- · Implementation and Financing.

design strategies to promote transit-oriented development, provide increased opportunities for rail ridership, improve first/last mile opportunities, and revitalize and reinvigorate Covina's town center.

The Town Center Specific Plan Update provides new development standards and incentives for high density/transit-oriented housing, and for the redevelopment/rehabilitation of existing structures, particularly regarding underutilized buildings and properties. Streetscape featuring pedestrian and bicycle enhancements will link the Metrolink station to Covina's historic shopping district, the local hospital/ medical area, and the envisioned "maker district" known as the F.A.I.R (Food, Arts, Industrial, Arts) district. These will further the vision of the Town Center Specific Plan.

The Town Center Specific Plan Update establishes a new boundary for the Plan Area, adding both sides of the residential Center Street, and expanding the northeastern boundary to include the Metrolink adjacent Kelby Park and the vacant Vita Pakt site. The proposed increased Plan Area is 226 gross acres (an increase of 66 gross acres). The City GIS estimated that there are 485 housing units and 448,801 square feet of nonresidential uses within the proposed Project boundaries.

The City's population was approximately 47,800 persons in 2010 (US Census). According to Southern California Association of Governments (SCAG), the City's population is projected to grow to 51,600 persons by 2040, representing a 7.9% increase over the 30-year period from 2010 to 2040.

Based on (1) the SCAG projections, (2) the Town Center Specific Plan Update's proposed components, (3) an analysis of existing underutilized sites that are likely to be redeveloped, and (4) the Town Center Specific Plan Update's market analysis, a projected capacity has been determined through the 2040 horizon year. The City estimates that the Town Center Specific Plan Update will support total gross development of up to 2.3 million square feet of retail, office, industrial, and public facility building space and 746 units through 2040, or a total net increase of approximately 1.9 million square feet of nonresidential uses and 261 residential units.

Projected Development Capacity (2018-2040), Town Center Specific Plan Update		
	Residential (Units)	Nonresidential (square feet)
Existing	485	448,801
Additional (Net New) Capacity by 2040	261	1,898,870
Total by 2040	746	2,347,670

Required Approvals: Implementation of the Project will require the following discretionary approvals by

- · Certification of the Final Environmental Impact Report;
- · Amendment of the Town Center Specific Plan;
- · Adoption of General Plan Amendments and any Zoning Code Text and Map Amendments necessary to ensure consistency between the Town Center Specific Plan, the General Plan, and the Zoning

EIR Scope: The City has determined that the proposed Project will require preparation of a DEIR pursuant to CEQA. Since none of the topical issue areas that would have been considered in an Initial Study have been screened out, the FIR will be comprehensive in nature and will address the environmental topics listed below. Where necessary, mitigation measures will be recommended to reduce potential adverse impacts.

Aesthetics: The EIR will describe and evaluate the potential aesthetic and visual impacts of the proposed Town Center Specific Plan Update, including its visual relationships to the surrounding vicinity and the potential impacts of Town Center Specific Plan development (the proposed array of building masses, heights, view corridors, etc.) on important surrounding scenic vistas and other visual resources.

Agriculture and Forestry Resources: The EIR will explain why these CEQA-defined environmental topics will not be adversely affected by the Project.

Air Quality: The EIR will describe and evaluate the potential short (construction)- and long-term (operational) impacts of the Town Center Specific Plan Update on local and regional air quality based on methodologies defined by the South Coast Air Quality Management District (SCAQMD).

Biological Resources: The EIR will evaluate potential impacts on biological resources resulting from the Town Center Specific Plan Update implementation, including potential impacts on nesting birds.

Cultural Resources and Tribal Cultural Resources: The EIR will identify and evaluate any potential Town Center Specific Plan Update impacts associated with historical, archaeological and paleontological resources, and tribal cultural resources.

Geology and Soils: The EIR will describe existing conditions and hazards (if any) with respect to earthquake faults and ground shaking, and potentially unstable soil, and the potential geotechnical implications of implementation of the Town Center Specific Plan Update.

Greenhouse Gas (GHG) Emissions: The EIR will describe existing conditions, estimate Project-generated emissions, and evaluate potential Project impacts following the latest approach and methodologies recommended by State and regional agencies.

Hazards and Hazardous Materials: The EIR will describe existing conditions with respect hazardous materials/waste sites, the potential for hazardous material use or hazardous waste investigation, and cleanup activities anticipated in the Plan Area and will describe any associated potential Project impacts. Potential demolition or construction related hazards will also be evaluated.

Hydrology and Water Quality: The EIR will evaluate potential impacts on hydrology and water quality resulting from implementation of the Town Center Specific Plan Update, including possible effects related to drainage and flooding.

Land Use and Planning: The EIR will describe the potential effects of implementation of the Town Center Specific Plan Update on existing and planned land use characteristics in the Plan Area vicinity, including the Town Center Specific Plan's relationship to other adopted regional and local plans.

Mineral Resources: The EIR will evaluate potential mineral resources (if any), including resources of statewide, regional, or local importance.

Noise: The EIR will describe the existing noise setting and potential construction and long-term operation noise (traffic, mechanical systems, etc.) impacts.

Population and Housing: The EIR will describe the anticipated effects of the Town Center Specific Plan Update implementation on existing and projected population and housing characteristics. This information will be used to forecast public service and utility needs in the Plan Area.

Public Services: The EIR will describe and evaluate potential impacts on public services (police and fire protection parks and recreation, and schools) and any mitigation needs.

Recreation: Potential Impacts to existing recreation facilities will be evaluated as well as the potential of the Project to generate the need for new or expanded facilities. Transportation and Traffic: The EIR will describe the transportation and circulation implications of the

proposed Town Center Specific Plan Update, including its incremental contribution to daily and peak hour traffic on local and regional roadways.

Utilities and Service Systems: The EIR will describe potential Town Center Specific Plan Update impacts on local utility and service systems, including water supply, water and wastewater treatment, and solid waste and recycling.

Alternatives: Pursuant to CEQA Guidelines Section 15126.6, the EIR will identify and compare a reasonable range of alternatives to the Town Center Specific Plan Update.
